E-Portfolio Help Document: Privacy & Passwords for Pages

E-Portfolio Privacy

Step 1: From within your e-portfolio click on the “Settings” link on the left hand side of the screen to open the settings dropdown box. Click on the “Privacy” link and then select the radio button that best represents the privacy setting that you would like. If you don’t want search engines like Yahoo and Google to find your eportfolio select the second option and then click “Save Changes”.

Password Protection for Individual Pages

Step 1: Click on the “Pages” link on the left hand side of the screen. Next identify a page that you would like to password protect and click that page or the “Edit” link under the page title.

Step 2: Click the “Edit” link on the right hand side of the screen by the “Visibility: Public” line. When the options drop down click the radio button labeled “Password Protected”. Type any password you want in the text box and click the “OK” link. Your page will now be password protected. Note: If you try to access the page when you are logged into your e-portfolio you will not be prompted for the password because you are already logged in as the administrator. If you want to test the password protection first logout of your e-portfolio and then re-visit it as a guest to see how the password protection function works.

The screenshot shows the WordPress admin interface for 'St. Mary Seminary'. The 'Pages' menu is highlighted, and the 'Edit' link is circled. The 'Edit Page' screen for 'E-Portfolio Content' is displayed. The 'Publish' dropdown menu is open, showing 'Password protected' selected. The page content includes a list of student submissions:
